

# MID Holder

Written By: zang

## TOOLS:

- [Pliers \(1\)](#)
- [Ruler \(1\)](#)
- [Sandpaper \(1\)](#)

## PARTS:

- [Bike spoke \(1\)](#)

## SUMMARY

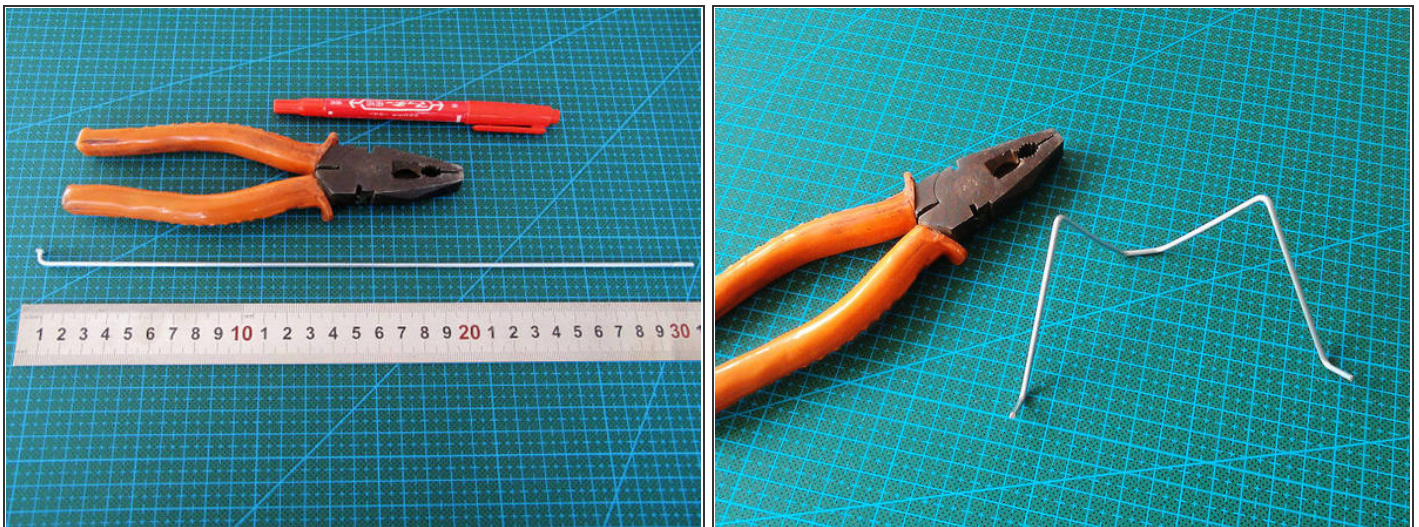

Bike spokes is useful part for small project. This holder was made by single 280mm spokes.

## Step 1 — MID Holder

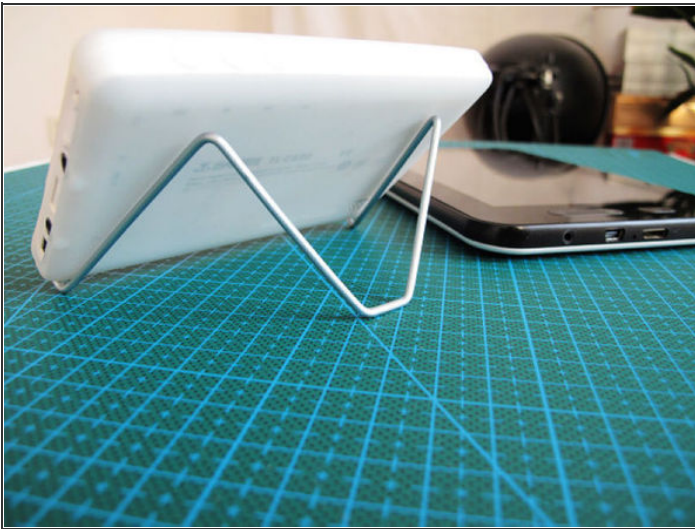

- Here is the completed holder with a 7" MID resting in it. front view and rear view.

## Step 2

- Use a mark pen to mark on the spoke where you want your bends to be. Bend the spoke with pliers. Smooth the cut end with sandpaper to avoid any scratch issue.

### Step 3

- all things is done!
- And the holder is all right for any small device.

All you need is sandpaper or a file to smooth the cut end of the spoke, a marker pen to mark on it and pliers to bend it. Simple!
